PARTNER SEARCH PMI 7-EU-BSGSME-32

Richiesta di un'università austriaca alla ricerca di partner da includere in un loro progetto da presentare nel programma CAPACITIES tematica RICERCA PER LE PMI . Troverete, di seguito, una breve descrizione del progetto e le caratteristiche del partner richiesto.

Per maggiori informazioni sulla Ricerca Partner e per conoscere i contatti del proponente, potete consultare il seguente indirizzo web.

----- PARTNER SEARCH PMI7-EU-BSGSME-32 -----

<Reference n.: PMI7-EU-BSGSME-32>

<Deadline: 11/04/2008>

<Programme: Ricerca per le PMI >

<Project Title: TREATASTHMA: Novel treatments for allergic asthma>

<Financial Scheme: Ricerca per il beneficio di gruppi specifici (SME)>

<Description: We are a working group at an Austrian Medical University. Our main interest is in the immunological mechanisms underlying the response to foreign materials, especially those that induce immune responses, particularly allergic immunity. We have established methods in in vitro and in vivo methods to evaluate the safety and influence of potential new drugs and compounds on the immune system in animal models. We have experience with coordinating FP7 proposals.

This project is dedicated to drug discovery. We are interested in screening new compounds for safety and efficacy in allergic asthma. Our aim will be to screen new compounds in vitro and in vivo in animal models and with in vitro human cell models. The RTD performers will

screen materials from SMEs in models to assess potential of compounds and if applicable, will perform experiments to help identify and/or confirm the targets. Importantly, the SMEs providing materials for study will have the IPR/patents/etc. on their compounds to exploit. We also encourage demonstration and training activities.

Keywords: Allergic asthma, immunology, therapeutics, drug discovery

Project budget (for the running projects): 1.5 million

Budget reserved for SMEs : To be determined. Please see the guidelines for this call. >

<Organisation Type: Università>

<Partner Sought: Partners already involved: Our laboratory will be focused on the animal models. We have an additional RTD partner who will provide screening in human models and one SME who will be providing novel compounds for screening.

Profile of SME / partner sought:

- technology development

Country /region:

- Any

Start of partnership:

- start-up phase

- mid-term

- end-phase

Expertise required :

SMEs who are developing novel compounds that they think will be useful for allergic disease. >
