International Computer Vision Summer School
Registration, Recognition and Reconstruction in Images and Video
Sicily 11-16 July 2011

WEB: <http://www.dmi.unict.it/icvss>
Email: icvss@dmi.unict.it

APPLICATION DEADLINE: 21 March 2011
<http://svg.dmi.unict.it/icvss2011/application.htm>

MOTIVATIONS AND DESCRIPTION

Computer vision is the science and technology of making machines that see. It is concerned with the theory, design and implementation of algorithms that can automatically process images and videos.

The fifth edition of the International Computer Vision Summer School aims to provide both an objective and clear overview and an in-depth analysis of the state-of-the-art research in Computer Vision and covers the three main areas of registration, recognition and reconstruction in images and videos.

The courses will be delivered by world renowned experts in the field, from both academia and industry, and will cover both theoretical and practical aspects of real Computer Vision problems as well as examples of their successful commercialisation.

The school aims to provide a stimulating opportunity for young researchers and Ph.D. students. The participants will benefit from direct interaction and discussions with world leaders in Computer Vision. Participants will also have the possibility to present the results of their research, and to interact with their scientific peers, in a friendly and constructive environment.

LIST OF SPEAKERS

William T. Freeman
Massachusetts Institute of Technology, USA

Martial Hebert
Carnegie Mellon University, USA

Ivan Laptev
INRIA, France

Jiri Matas
Czech Technical University, Prague

Vittorio Murino
University of Verona, Italy

Shmuel Peleg
The Hebrew University of Jerusalem, Israel

Kari Pulli
Nokia Research Center, USA

Ramesh Raskar
Massachusetts Institute of Technology, USA

Guillermo Sapiro
University of Minnesota, USA

Jamie Shotton
Microsoft Research Cambridge, UK

Josef Sivic
INRIA, France

Stefano Soatto
University of California, Los Angeles, USA

Steven Seitz
University of Washington, USA

Lorenzo Torresani
Dartmouth College, USA

Steve Zucker
Yale University, USA

DIRECTORS

Roberto Cipolla
University of Cambridge, UK

Sebastiano Battiato
University of Catania, IT

Giovanni Maria Farinella
University of Catania, IT

APPLICATION

The school will be open to about 100 qualified, motivated and pre-selected candidates. Ph. D. students, post-docs, young researchers (both academic and industrial), senior researchers (both academic and industrial) or academic/industrial professionals are encouraged to apply: <http://svg.dmi.unict.it/icvss2011/application.htm>

The expected school fee will be in the order of 600,00 € for Master and Phd students, 750 € for others academic position and 900 € for all the others. The fee will include, all courses, handling material, coffee breaks, welcome cocktail, bus service from Catania Airport to School Location and viceversa, WiFi Internet Connection, a guided tour and social dinner to Ragusa Ibla, a folcloristic exhibition of the Herbessus Sicilian Group Dancers, and bus service from School Location to Catania, Siracusa and Taormina at the end of the school.

The application at ICVSS 2011 should be done before 21 March 2011.

Applicants will receive notification of acceptance by 31 March 2011.

POSTER SUBMISSION

The International Computer Vision Summer School is especially aimed to provide a stimulating space for young researchers and Ph.D. Students. They will have the possibility to present the results of their research on the topic of the school, and to interact with their scientific peers, in a friendly and constructive environment. Accepted students may submit a poster to present their research activity. The poster should be submitted before 10 May 2011. Suitable space will be reserved to students for showing their posters. The electronic version of the posters will also be available from the ICVSS web site.

BEST PRESENTATION PRIZE

A selected subset from the submitted posters will be selected by the school committee for short oral presentation. A best presentation prize of 700 euros (supported by Toshiba Research Europe) will be given to the best presentation selected by the school committee.

SCHOLARSHIP

A scholarship will be awarded to the best PhD student attending the school. The decision will be made by the school committee at the time of the school, taking into account candidates'cv, poster and oral presentation. All PhD students attending the school will be considered.

READING GROUP (WITH PRIZE!)

During a typical PhD and subsequent research year, students will read probably more than 100 papers.

Reading research papers is a skill that can be acquired and that is very different from reading a novel.

This session is to introduce students to that skill.

Good ideas have deep roots. Understanding such roots is key to being able to generate new ideas moving forward.

The goal of the Reading Group is to practice ways in which exploration of these roots can be performed.

The homework prior to the commencement of the school consists in studying (not just reading) one or more of the references provided by the school committee, and tracing the ideas as far back as you can.

Detailed instructions will be sent to students after acceptance notification.

LOCATION OF ICVSS 2011

ICVSS 2011 will be hosted by Hotel Village Baia Samuele in Punta Sampieri - Scicli (Ragusa), Sicily from 11-16 July 2011. Sicily is one of the most beautiful islands of the Mediterranean. The island is very rich in archeological sites from various Ancient Civilizations. The sea, weather, food and the wine are excellent. In particular Punta Sampieri - Scicli (RG) is located in the south east of Sicily in a late Baroque area called Val di Noto. The Val di Noto area is included in the Unesco World Heritage List and includes

eight nearby towns: Caltagirone, Militello Val di Catania, Catania, Modica, Noto, Palazzolo, Ragusa and Scicli. The location of the school rises in the middle of an ample bay delimited on the west from Sampieri and on the east from a cliff, on which is founded an ancient furnace, rare example of industrial archaeology. The Hotel Village "Baia Samuele" stretches in a gentle slant to the beach: 120 thousand square meters delimited from rows of secular cypresses. An ultramodern village with an original architecture, pleasant design and all comforts you can imagine. The frame of plants and flowers, typical of this angle of Sicily, in front of the island of Malta, completes this gilded dream of the Mediterranean.

ACCOMMODATION RESERVATION AT HOTEL VILLAGE BAIAM SAMUELE

ICVSS participants will be hosted at Hotel Village Baia Samuele (school location) at very special rates. ICVSS participants must make reservations for accommodation no later than 15th April 2011, using the accommodation reservation form (see online) to be sent by fax (+39 0932848603) directly to Baia Samuele reception. After 15th April 2011 there is no guarantee for reservations in Hotel Village Baia Samuele.
