A network for European researchers working with China or in China: online consultation

A Network for European Researchers in China\*  
(ERA-Link/China)

A new network is being developed for European researchers in China. It will provide web-based and other services for researchers who want to improve their contacts with other European researchers in China and Europe. This project is supported by the European Commission (Directorate General for Research and the Delegation of the European Commission to China) in collaboration with the Embassies of the EU Member States in China and the other European countries associated with the European Research Area.

A survey has been launched to identify ways of developing the network and the types of information and services that would be useful to European researchers. The results of this survey will be used to develop the network to be launched under the name ERA-Link/China later this year.

We would be very grateful if you could take the time to fill out this survey. It should take approximately 10 minutes to complete. You can access it by clicking on the following link:

ERA-Link/China Online Survey

\* European Researchers, including:

- (i) Europeans who may not be doing research stricto sensu but have connections with science, technology or innovation activities in both public or private sector, e.g. European engineers, students, investors, entrepreneurs, patent attorneys, etc;
- (ii) European researchers that are in contact with Chinese researchers, have co-published with them and/or frequently travel to China for work;
- (iii) European researchers that would be interested in coming to China to work with Chinese researchers;
- (iv) Representatives from European or Chinese organisations hosting European researchers in China.
