<Project Title: Preclinical Pharmacological Evaluation of New Cannabinoid Derivatives >

<Financial Scheme: >

<Description: Synthesis and pharmacological behavior studies of new cannabinoid derivatives are in progress at PharmaNess laboratories. The Company has recently claimed two new series of these compounds through two Patent Application regarding both CB1 and CB2 ligands. This project aims to evaluate the properties of new cannabinoid derivatives obtained in our laboratories, in particular towards potential applications on food intake, ocular diseases (i.e. glaucoma), inflammation, pain.

The pharmacological behavior of these new cannabinoid CB1 and/or CB2 ligands will be studied by both in vitro and in vivo assays.

<Organisation Type: PMI >

<Partner Sought: University from France, Germany, Great Britain and from other European Countries.
