EU Funding Opportunities

Some information concerning EU funding opportunities and some of our upcoming courses we are organizing for the autumn.

Attached you can find a small publication on the community funding opportunities offered by the European Union. This is just a brief informational to provide you with new possibilities for your university that you may or may not be aware of. Additionally there is a brochure on our FP7 Project Development course that will be held 6-8 October and 10-12 November. The course guides potential FP7 project proposers through the difficult issues of call identification, consortium building and project development. We thought this might be of interest to you and your colleagues to help in accessing EU funds for research.

The earlybird registration is open until 1 October for the October course and 10 October for the November course. Also, you and your colleagues are eligible to receive our Academic rate, 10% off the earlybird registration. Please contact me personally in order to receive the additional reduction.

More information about the courses and additional courses can be found at http://www.eutrainingsite.com/open_courses.php
