----- PARTNER SEARCH PMI7-EU-BSGSME-37 -----

<Reference n.: PMI7-EU-BSGSME-37>

<Deadline: 11/04/2008>

<Programme: Ricerca per le PMI >

<Project Title: ASSET: ADVANCED STRATEGIES FOR SMEs IN MANUFACTURING SECTOR >

<Financial Scheme: Ricerca per il beneficio di gruppi specifici (SME)>

<Description: Most of the European manufacturing SMEs do not have the capability to adapt to the continuous changes of the global economy. On one hand, they have neither resources nor capability and experience to evolve with this dynamic environment, and on the other hand, they do not have the global visibility and strategy.

For that reason, the ASSET project will develop and validate solutions for solving the operational support of enterprises and enterprise networks making use of tools based on advanced architectures, collaboration and modelling.

The aim of the project is to support SMEs and SME networks, facilitating regional trade

growth and European visibility and competitiveness.

The results of the project are totally flexible allowing to develop new models and to use these new developed models.

Then, the project will provide the following results:

- Methodology for analysis and reengineering of business processes and the evaluation of the use of several technologies (such as Information and Communication Technologies) for problems identification and area improvements.

- To model the operational support of enterprises and enterprise networks providing innovative solutions for design these models (Model Driven Engineering).

- To develop a library of models for business processes and collaborative business processes that will be common for SME and based on the best practices.

- To incorporate run-time solutions to support SME operations in compliance with the modelling strategies, including the supply chain management.

<Organisation Type: Centro di Ricerca>

<Partner Sought: We are looking for partners willing to participate as:

- Supplier SME
- Manufacturer SME
- Wholesaler SME
- Retailer SME
- End User SME

.With expertise in : Traditional Business sectors (such as furniture)

The main roles in the project will be to define user requirements, pilot developed solutions (i.e. tools based on advanced architectures, collaboration and modeling), and dissemination to the industry.

-Other:

.SME Association

ROLE:

- Technology development
- Technology supplier
- Technology user
- Validation and test assistant >
